It also contains theme panels presenting phrasal verbs in topic groups [e.g. relationships: chat up, ask out, settle down, split up].

Phrasal Verbs-Stefan Thim 2012-10-30 The book traces the evolution of the English verb-particle construction (‘phrasal verb’) from Indo-European and Germanic up to the present. A contrastive survey of the basic semantic and syntactic characteristics of verb-particle constructions in the present-day Germanic languages shows that the English construction is structurally unremarkable and its analysis as a periphrastic word-formation is proposed. From a cross-linguistic and comparative perspective the Old English prefix verbs are identified as preverbs and the shift towards postposition of the particles is connected to the development of more general patterns of word order. The interplay of phonological, morphological, syntactic and semantic factors in the loss of the native prefixes in the history of English is investigated. In this context the question is discussed to what extent the older prefixes were replaced by particles and borrowed prefixes, how the characteristic etymological and semantic properties of the Modern English phrasal verbs can be explained and what role they play in the lexicon. The author argues that their common perception as particularly ‘English’, ‘colloquial’ and ‘informal’ has its origin in the eighteenth-century normative tradition.

Mining Conference IIS:IIIPWM'04 which was held in Zakopane, Poland, on May 17-20, 2004. This conference is a continuation of a series of 13 successful symposia and conferences on Intelligent Information Systems, organized by the Institute of Computer Science of Polish Academy of Sciences, devoted to new trends in (broadly understood) Artificial Intelligence. The idea of organizing such meetings dates back to 1992. Our main in tention guided the first, rather small-audience, workshop in the series was to resume the results gained in Polish scientific centers as well as contrast them with the research performed by Polish scientists working at the universities in Europe and USA and their foreign collaborators. This idea proved to be attractive enough that we decided to continue such meetings. As the years went by, the workshops has transformed into regular symposia devoted to such fields like Machine Learning, Knowledge Discovery, Natural Language Processing, Knowledge Based Systems and Reasoning, and Soft Computing (i.e. Fuzzy and Rough Sets, Bayesian Networks, Neural Networks and Evolutionary Algorithms). At present, about 50 papers prepared by researchers from Poland and other countries are usually presented. This year conference devotes much more attention to the newest developpments in the area of Artificial Intelligence, related to broadly understood Web mining.

**Lexicography Then and Now**-Ladislav Zgusta 2006-01-01 Professor Zgusta's work in lexicography and linguistics proper is built upon a multilingual command of linguistic theory, literary history, the history of linguistics, and his experience as a "practical" lexicographer. The topic under consideration may be the organization and development of a standard variety of a language; explorations of the consequences of linguistic theory on the practical lexicographic applications in making dictionaries that range from Ahtna to Zoque and Batad Ifugao to Yolngu-Matha; the method of definition in bilingual dictionaries; the state of affairs in Russian lexicography; or behind the scenes at the making of the Czech-Chinese dictionary. The reader will not only be offered a careful and wide-ranging study of these important topics in the discipline, but will be taken on a guided comparative and historical tour that illuminates the strengths and weaknesses of current practice and theory. His work reminds those linguists and lexicographers who are locked into "paradigm" battles of the Kuhnian kind that the wheel has already been invented. Most of the articles in this volume have been updated. The editors have also conflated six articles on the history of dictionaries into one seamless narrative with connective tissue supplied by Zgusta.

**Longman Children's Picture Dictionary**-Carolyn Graham 2002-11 Specially written for 6- to 9-year-olds, this dictionary includes 800 words organized into 50 topics and comes complete with songs and chants by Carolyn Graham. Themes are selected to appeal to this age range and two CDs include all the vocabulary, mini-dialogues and songs/chants.

**Phrasal Constructions and Resultativeness in English**-Marina Gorlach 2004 Eat up the apple or Eat the apple up? Is there any difference in the messages each of these alternative forms sends? If there isn't, why bother to keep both? On the other hand, is there any semantic similarity between eat the apple up and break the glass to pieces? This study takes a fresh look at a still controversial issue of phrasal verbs and their alternate word order applying sign-oriented theory and methodology. Unlike other analyses, it asserts that there is a semantic distinction between the two word order variants phrasal verbs may appear in. In order to test this distinction, the author analyzes a large corpus of data and also uses translation into a language having a clear morphological distinction between resultative/non-resultative forms (Russian). As follows from the analysis, English has morphological and syntactic tools to express resultative meaning, which allows suggesting a new lexico-grammatical category of resultativeness.
